

A collaboration between clinical practice and academia

Handling medication in hospitals, – exploration of nursing practice

EXPERIENCES:

- Nursing research in the clinic
- Increased research competence
- Knowledge about work-interruptions
- Collaboration between the hospital and the university, and the three hospital units in Helgeland

METHOD:

- "Research education"
- Exchanging of experiences and challenges
 - Paperbased observation-form
- One by one interviews

METHOD CHALLENGES:

- Common understanding of the observation-form
- Handle the observation-form independently
 - Researching in own field
 - Research effect
- Familiar with the role as a scientist

THE WAY FORWARD:

- Analyses of the data
- Presentation at national and international conferences
- Scientific publications
